To Become Popular A Variety Must Be Good

The Scarlet Beauty strawberry has, in the past few years, increased in popularity to such an extent that we are today propagating as many plants of this variety as we are of Premier, which for twenty years has led the field in strawberries. This shows us that the Scarlet Beauty is proving to be a berry that is universally liked and recommended by our customers and that it is doing exactly as we said it would do when we introduced it a number of years ago. We don't know of a single variety of strawberries that will produce the outstandingly large size fruit that this variety produces. It comes on the market at α time when other strawberries are not present, so that it always commands an exceptionally high price. Being a berry of extremely bright red color, it has a large size brilliant green calyx. This makes for beautiful appearing berries, as they always look fresh no matter how long they have been packed.

THE WORLD'S GREATEST STRAWBERRY

Scarlet Beauty will produce more huge, first-class berries than any variety we have ever seen. It has healthy foliage, is an excellent plant maker, and a great producer. This makes Scarlet Beauty the best today.

Huge Size, Bright Color

Scarlet Beauty produces fruit of extremely large size that is slightly round with a very bright green calyx. The fruit is extremely bright and showy. Stands shipment well as the fruit is solid clear through.

Good Grower and Late Fruiting Season

Scarlet Beauty is a perfect flowering variety which requires no pollinizing. It is the only semi-late berry that will produce as many or more quarts per acre as the Premier. It begins to ripen soon after Premier and continues to produce large size fruit until the season ends. The plant itself is rather small, but exceptionally long rooted. Produces a fine picking row where some varieties would be a failure. 100 plants should be in every garden in the U.S. When we introduced Scarlet Beauty we thought so much of it that we offered to replace free of charge any plants that any of our customers would buy if they were not entirely satisfied after they had been fruited one year. Up to date, having shipped hundreds of thousands of this variety, we have had to make no refill of plants and have only received one complaint on this variety.

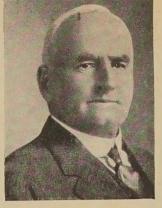

STAHELIN'S Michigan Grown FRUIT TREES and PLANTS Have Stronger Roots—Grow Fast

C. A. Stahelin

For over thirty years Stahelin's high quality trees and plants have made money for successful growers all over the country.

And there's a good reason! Stahelin's plants are grown in the

F. C. Stahelin

cold climate of southwest Michigan, famous as a producer of extra hardy Nursery stock. Our sandy loam, heavily fertilized every year, gives the plants heavy root systems that start growing as soon as you plant. Periodic inspections for disease and close supervision of grading assure your receiving nothing but the highest quality plants.

We are sure once you try Stahelin's quality Nursery stock, you will never want any other. Look through this new 1950 catalog and place your order. It lists everything you need for profitable planting. If you would rather plant in the fall, keep the catalog and place your order during the summer months or early fall. Plants will then be shipped as soon as they are ready to dig. We guarantee no price increase on fall orders.

IMPORTANT

Transportation charges on all stock listed in this catalog are to be paid by the customer as the weight of nursery stock cannot be determined exactly in advance of shipment.

NOTICE

For approximate shipping charges, refer to the back of our order sheet enclosed with this catalog. Complete schedules and rates, as closely as they can be figured will be found there.

FALL SHIPMENTS

We encourage the fall planting of nursery stock. Plants and trees are dormant then, and when warm weather comes in the spring your stock is ready to commence growing. Nursery stock can't be shipped until it has had some cold weather to harden it up, and fall shipments are usually made after the middle of October. NO DISCOUNT ON FALL ORDERS.

C.O.D. ORDERS

We can ship C.O.D. if order amounts to \$3.00 or more at full catalog price, no discount allowed, but 10c on each dollar must be included with your order as a down payment. It order amounts to \$3.00, send 30c with order; if \$4.00, send 40c, etc. You may inspect express shipments before you pay. (Parcel Post not subject to examination.) If satisfactory, pay the agent the amount due.

CERTIFICATE OF NURSERY INSPECTION

Michigan State Department of Agriculture—Orchard and Nursery Inspection No. 717.

This is to certify that the nursery stock of Stahelin's Nursery, Bridgman, Michigan, has been examined and found to be apparently free from dangerous insects and dangerously contagious tree and plant diseases. Fee paid \$46.25.

Chas. Figy, Commissioner, Lansing, Mich.

Bureau of Agricultural Industry, C. A. Boyer, Director.

August 13, 1949.

DON'T WAIT TO ORDER

Our customers have been very fine in the past few years in placing their orders early. Please remember that the shipping of strawberry, asparagus and that class of plants depends entirely on weather conditions here. WE POSITIVELY DO NOT SHIP ANY STORAGE PLANTS. We will endeavor to fill your order as close to the time specified as we can, but if excessive rain or cold weather hits us at that time of the year there may be a slight delay.

REFERENCES

American Railway Express Agt., Bridgman, Michigan Benton Harbor State Bank, Benton Harbor, Michigan Union State Bank, Buchanan, Michigan Dun & Bradstreets, Commercial Agency

Orders received during January at the prices quoted in this catalog, with cash in full enclosed, are subject to a 10% discount. This amount to be deducted from your remittance. Special prices or quotations by mail not subject to discount. THIS DISCOUNT NOT GOOD AFTER FEBRUARY 1st, 1950.

STAHELIN'S GUARANTEE

All nursery stock you buy from Stahelin's is guaranteed to arrive in first class condition, and be free from disease, if shipped by express or mail. We assume no responsibility for freight shipments. If for any reason you are not satisfied, we must be notified as soon as stock is received. As our nursery stock is guaranteed to arrive in a live condition, our responsibility ceases as soon as stock is planted, for we cannot be responsible for weather or other conditions beyond our control. If through error, any stock proves untrue to name, it will be replaced free of charge the following season. At no time are we responsible for more than the original cost of the stock.

Three Strawberries Recommended as

The BEST for HOME FREEZING

Delicious New FAIRLAND

An excellent variety for home use or market

Fairland is another one of the varieties developed by the U.S. Department of Agriculture to combat the Red Stele disease. Fairland is being grown very generally in Berrien County, Michigan, one of the biggest strawberry growing sections in the U.S., as a market berry and our growers here make very favorable reports on it. They are extending their plantings considerably this year.

The Fairland Strawberry ripens just a few days after Premier. It is just as productive as Premier with a firmer berry. These berries are large in size and a light bright red color. Fairland has proven to be an excellent shipper for this reason and as it is entirely Red Stele resistant it does particularly well in the middle and upper northern states. It is a fine variety for garden use and is one of the best berries that we know of for freezing. It is a good plant maker and a variety which we recommend to you for trial. "Illustrated in color on front cover."

PRICES

25 for \$1.00 250 for \$ 5.90 2000 for \$34.00 50 for 1.70 500 for 9.50 5000 for 80.00 100 for 2.85 1000 for 18.00

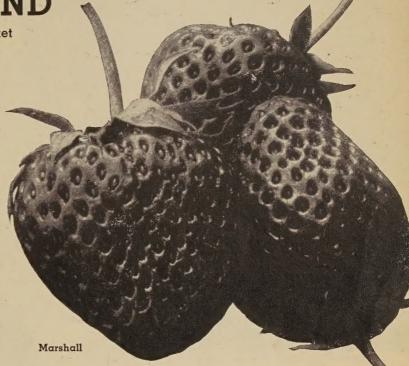

New SPARKLE

NAMED FOR ITS BEAUTIFUL COLOR

The Sparkle strawberry is the berry that came to us from the New Jersey Experimental Station. It is very resistant to Red Stele and other strawberry diseases which sometimes attack the weaker varieties. It will grow under conditions of wet weather where the orientary strawberry would soon die. It gets its name chiefly from its wonderful sparkling appearance. It yields heavy crops and is midseason in ripening. It is a quality berry, very uniform in shape, and medium to large in size. A good plant maker and we recommend it for trial. **PRICED BELOW.**

PRICES: MARSHALL AND SPARKLE

25 for \$.95 250 for \$ 5.95 50 for 1.65 500 for 8.95 100 for 2.75 1000 for 17.00 2000 for \$30.00 5000 for 70.00

MARSHALL

RECOMMENDED BY ALL THE AUTHORITIES AS BEING ONE OF THE FINEST BERRIES FOR FREEZING.

The Marshall strawberry has been grown a number of years in all sections of the country but with the advent of the home freezer and the freezing of strawberries in the locker plants, it has been revived. It is coming back to great popularity as, from the tests which have been made, it has proven to be the finest of strawberries for freezing.

LARGE SIZE HEALTHY PLANTS

The Marshall is a perfect flowering variety. It grows in rather upright manner and is very healthy. The plant is large, the foliage has a leathery appearance, berries are large in size and quite pointed, with an occasional green tip. The ripening season is just a few days later than Premier.

If you are looking for a berry that freezes well, is sweet, and excellent for preserving purposes, we recommend the Marshall grade highly. **PRICED AT LEFT.**

Jamous GEM EVERBEARER

The Favorite Everbearer. Back in 1935 we received under exclusive contract with the originator, our parent supply of this variety. It is the only everbearer that makes plants freely. The berry is dark red, pointed—about the size of Dunlap, of excellent quality, and has a sweet tart flavor. Will commence to bear about 60 days after planted, and will continue to do so all summer and up until cold weather sets in. Can be grown on soil where an ordinary everbearing would be a failure. Plants set in April or May start bearing in July and continue until winter. Bears two crops again next year.

PRICES

25 for \$1,15 500 for \$10.50 50 for 2.25 1000 for 19.50 100 for 3.50 2000 for 36.00 250 for 6.75 5000 for 85.00

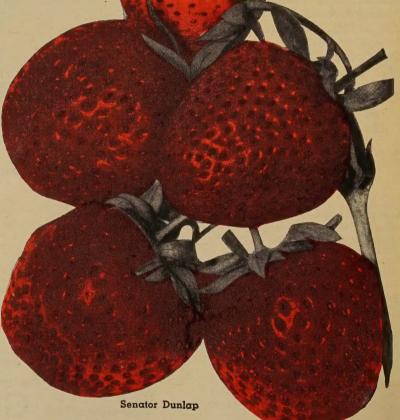

TEMPLE

The New Strawberry That Is Entirely Resistant To All Root Diseases

The past year we have fruited Temple quite extensively here on our farms. We think that it is one of the finest dessert strawberries that we have ever picked. It has a beautiful dark red color and it is very firm when fully ripe. It is a very remarkable grower and will survive wet weather conditions under which the ordinary strawberry would be a total failure. The plants grow unusually tall. The fruit is a very good shipper. It yields heavily and ripens just a few days later than Premicr. Berries are large, have a brilliant calyx, and present a fine appearance when packed.

SENATOR DUNLAP

A Proven Variety For Over 30 Years

The Senator Dunlap is perhaps the oldest strawberry that is being listed today. It was popular 30 years ago and is still popular. Much of this popularity comes from the housewife, who knows that the Senator Dunlap is one of the outstanding varieties for home use or canning. The plant is very vigorous, will grow on the poorest of soils, and seems to do well in every state in the Union. The berries are a beautiful crimson color, firm and quite pointed. We are pricing this variety in large quantities this year at a figure which has not been possible for a number of years and you should increase your planting of Senator Dunlap now.

Stabelin's PREMIER "Frost-Proof" Qualities

Premier

Frost-Proof

Stahelin's Premier is practically immune to late spring frost and if you are located in a section where such trouble occurs, you can be assured of getting a fine crop if you will plant our Premier. This is due to the peculiar plant growth which it makes, almost completely hiding the blossom and protecting it from severe cold.

Excellent Shipper

An extremely juicy berry, yet quite firm, making it an excellent shipper. It comes on the market when there are practically no other strawberries. Most of the fruit is pointed, although the berries are of various shapes, resembling most all varieties of strawberries. They are of bright showy red, and have a large calyx. If you want a big crop of fine fruit that will stand a lot of extreme cold weather when they are in blossom and not freeze, plant Stahelin's Premier.

PREMIER PRICES

25 for \$.95 50 for 1.60 100 for 2.70 5.70 250 for 500 for 8.50 1000 for 15.95 2000 for 30.00 5000 for 65.00

BLAKEMORE

Great Shipping and Canning Berry

The Blakemore is by far the best early shipping berry the South ever had. Stands a lot of abuse and neglect in growing, more than any other variety we know of. Produces enormous amount of fruit of fine quality, and will produce this fruit on land where common varieties would be a failure. Desired by canners and coldpack men. Every Blakemore plant we offer is of the "Yellowsstrain. These plants will outbear the common run of Blakemore, and growers should take advantage of this fact.

PRICES

25 for \$.80 50 for \$ 1.25 100 for \$ 1.70 500 for 6.45 250 for 3.55 1000 for 12.00 5000 for \$49.50 2000 for \$22.00

CATSKILL

The Sugar Flavored Strawberry

It is now generally recognized as one of the best of the midseason to late varieties. This popularity is due to the fact that it will produce more quarts of large berries than any other variety. It is a sure cropper, as it ranks next to Premier in this respect. It rarely ever freezes. Catskill is bright shiny red, the berries hold

their color very well, and when they are carefully packed present a very attractive appearance. The foliage of the plant is rich, waxy in appearance, and the fruit is produced on long picking stems. It ripens when the market is almost bare of fruit, and for this reason always commands a good price.

Giant Cultivated BLUEBERRIES

The Greatest Development in Fruit Growing

The cultivated blueberry will bring you more cash money per acre than any other type of berry plant that we know of today. These marvelous berries can be grown on any soil that is moist or damp as long as it has a slight acid reaction. The size of the fruit is remarkably large and the quantity is such that you can't describe them. It is unfortunate that everyone of our customers can't see these fruits in bearing or they would have at least a dozen in their garden. We are offering one year plants at a low price this year and you can get started at a very low cost.

RANCOCAS Very Early

Is of excellent quality, and a very good shipper. The bush does not grow quite as tall as Rubel, but it produces a lot of fruit over a long picking season. PRICED BELOW.

STANLEY Early Midseason

A tall vigorous grower. Produces very large berries of excellent quality. Thick shiny leaves. A good variety to plant as companion to Rubel and Jersey. PRICED BELOW.

JERSEY Midseason

In our opinion, Jersey is superior to some of the other blueberries. The bush is very upright, vigorous and a large producer. The fruit is enormous in size, very attractive, firm and very sweet. We recommend Jersey for home use as well as shipping. PRICED BE-

RUBEL Late

This variety was one of the first that was offered to the public, and has continued down through the years to be one of the best. Is a parent of many of the present hybrids. The bush is upright, very vigorous, hardy and productive. Ships well. Is a producer of large size fruit, and a heavy bearer. PRICED BELOW.

NECTARINE (Fuzzless Peach)

One of the most delicious of all fruits. Smooth skin like a plum. Has a rich flavor, juicy, and highly prized as a dessert fruit. Nectarines are as hardy as the peach and require the same culture. Fruit is a bright golden color with slightly red cheek. Tree is vigorous and bears young. Prices: Medium size trees, \$1.45 each; 3 for \$3.90, 10 for \$11.50.

is the Orange variety. This is a dwarf growing tree which should be planted about 12 to 14 ft. apart. The foliage is very leathery, disease resistant, and quite dark in appearance. Orange Quince is hardy in practically all sections. fruit is large like a good sized apple, golden yellow in color. This variety is valued very highly for preserving or jelly making. Price: 2 to 3 ft. each \$1.45; 3 for \$3.90, 10 for \$11.50. 3 to 4 ft. each \$1.65; 3 for

\$4.50, 10 for \$12.50.

Giant THORNLESS BOYSENBERRY

EARLY RIPENING SEASON

The New Thornless Boysenberry is an off-spring of the common thorny type Boysenberry. It is a sport that has been carefully selected and improved until it is practically free of thorns. It has

the same size as the common Boysenberry, often measuring from 2 to 3 inches in length. It ripens 10 days to 2 weeks earlier than the common Boysenberry, which gives it a decided advantage for the grower who wishes to get his berries on the market while prices are at the top. In the selection of plants, size of fruit was also taken into consideration, as well as ripening season, so the new Thornless Boysenberry is regarded as a superior strain of the old. Very highly regarded for culinary purposes. **PRICED BELOW.**

THE LARGEST BERRY GROWN

This variety is of the Dewberry type, and must be placed on a trellis for best results. These dark maroon colored berries often measure from 2 to 3 inches in length.

Boysenberry has a distinctly different flavor, and when allowed to ripen on the vines is much sweeter than any other of the dewberry types. Is very juicy and sweet, and will hang for days on the vines after it is ripe. Is quite hardy, and ripens a few days earlier than the dewberry. **PRICED BELOW.**

Stahelin's Ever Popular BLACKBERRIES

ALFRED

Thornless

Boysenberry

It is the most coreless blackberry that we have. It succeeds almost everywhere. Is of excellent flavor, very firm, and the size holds up well to the end of the picking season. Has very small seeds. Hardy, and has withstood 30 degrees below zero. Has long picking season. Ripens a few days earlier than Eldorado. The plant is a very vigorous grower, and at no time has been infected with common blackberry diseases. Its Michigan origination makes it adaptable to all sections. PRICED BELOW.

ELDORADO

Produces a full crop of jet black berries of large size. Has a delicious aroma and flavor. Is an excellent shipper, retaining its rich glossy black color after being picked. Very small core, and is a favorite for canning. Extremely hardy. Most of the fruit is borne on the top part of the plants, and care should be taken when trimming not to cut it back too far. **PRICED BELOW.**

FREE Cultural Instructions Included With Order If Requested.

EARLY HARVEST

We think this is the finest of all blackberries for home use. Fair in size, deliciously sweet, and has very few seeds. The only blackberry that some housewives use for canning purposes.

1 Year Plant

No Waiting Make Money on Raspberries the First Year!

Plant STAHELIN'S 2-yr.-old BEARING AGE PLANTS

As a great many of our customers desire quick results in their gardens, we have produced a few thousand of these large size black raspberry plants to supply this demand. These black raspberry plants are very large. They will run from 18 to 24 inches in height. They will all be branched and they will have a mass of heavy roots. If you plant them carefully every one of them will live and will produce a partial crop for you the first year. A great many commercial growers are planting this type of plant as it assures them of getting a full crop in two years, whereas the one year plants must be grown three years in the field before they will bear to any extent. We suggest to those that order these two year plants that they cut them back to some extent and not allow them to bear fully the first year.

Stahelin's BLACK RASPBERRIES

CUMBERLAND

Most popular black raspberry today because of its great size, beauty, its firmness and productiveness. The fruit is the largest of the black raspberry family, often measuring practically an inch in diameter. Cumberland is very hardy, and will stand many degrees below zero without injury. It sets a great many berries, and should be heavily trimmed to get best results. Is a wonderful canning berry, makes delicious pies and jelly. Commands top market prices for black raspberries. Is almost disease free, and very popular because of this quality. Stands severe drought and cold weather conditions well, and is able to grow on almost any soil that is not wet, PRICED BELOW.

EARLY SWEET LOGAN BLACK RASPBERRY

An Ohio origination. Logan ripens 7 to 10 days ahead of Cumberland, which allows the grower to get on the market ahead of other varieties, giving him an opportunity to make some real money. Produces immense crops of jet black berries, as large as Cumberland. Does not crumble, and the last picking looks as nice as the first. Stands severe weather conditions. A great deal of its present popularity is due to its "disease-free qualities." **PRICED BELOW.**

MORRISON THE GIANT BLACK RASPBERRY

This variety originated as a chance seedling in northern Ohio and has attracted a great deal of attention by commercial growers because of its abnormal size. The plant is an extra strong grower, being quite free from the common black raspberry diseases. It ripens somewhat later than Cumberland and has a very dark glossy color. The berries are firm in texture and high in quality. The plants are not plentiful and the price is somewhat higher than is commonly asked for the old varieties. However, we believe a trial planting will convince you that they are well worth the additional cost

Stahelin's RED RASPBERRIES

LATHAM THE FAMOUS LATE

The Latham is a big, late ripening, red raspberry that grows on a very stiff cane and comes on the market at a time when practically all other raspberries are gone. It is very productive; will produce from 5,000 to 7,000 quarts per acre, which is about twice as much as any other red raspberry will produce today. This is a superior variety which does well in all sections of the country. It is

adaptable to all sorts of soil conditions, climates, and sections. Cold weather has no effect on Latham, as it originated in Minnesota. It is a great shipping and canning berry because of its wonderful qualities. Produces fruit of large size, fine color and good flavor.

The plants that we offer are of the best quality and will carry

double and triple inspection certificates as to being free from disease. Plant them on soil that is disease free and you can continue to keep them this way. Our No. 1 plants are heavy and extra fine selected stock not to be compared with the ordinary run of plants sometimes offered.

Latham

FR EE

Cultural Instructions Included with Order if requested

SUNRISE THE FINEST EARLY TODAY

A comparatively new early red raspberry, which we recommend very highly. It starts to ripen in Michigan the latter part of June, about two weeks ahead of Latham, and because of its habit of sending up long shoots from the bottom of the cane which ripen later than the buds at the top. it has an extremely long picking season. Is about the size of Latham, and is a bright red , when ripening. Fine textured, juicy; does not crumble, and very firm. Does not require expert attention to grow. Plants are vigorous and bear heavily. Sunrise is easy to pick, easy to sell, easy to grow and

WASHINGTON

This is an entirely new red raspberry that originated in the state of Washington where red raspberries have proven to be a very profitable venture. It is a real addition to the commercial red raspberry growers list of fine varieties. It is quite resistant to disease, is very hardy, and the fruit is of excellent quality with a very fine flavor. This variety has one peculiarity in regard to its bearing habits. It bears over an unusually long period. Then shortly after the main crop has been harvested the young canes will start to bloom and put on another crop during the early fall. The fruit has a remarkable bright red color and the all around excellence of this berry should cause it to be tried by a great many of our raspberry growers.

CRIMSON KING RED NORWAY MAPLE

(Patent No. 735)

In offering you the Crimson King Maple, we are giving you an opportunity to purchase one of the most beautiful of all red-leafed trees. It grows identical with the common maple, and to the same size, but is covered with extremely blood-red leaves the entire year, and is hardy.

It was originated in Norway. It is creating a sensation in the United States today, and we are very fortunate in having a limited amount of these trees to offer. Unfortunately, only small-sized trees are available, but these 2year-old trees will grow rapidly, and become beautiful showy trees in a short time. This is distinctly a new red novelty which has been proven to be entirely hardy, and retains beautiful red leaves throughout the season.

Price: 3 to 4 ft. \$3.25 each; 2 for \$6.25.

Mac Donald RHUBARB

A Canadian origination, far superior to any of the other kinds of rhubarb. Is bright cherry red the full length of the stalk, very large size, and a huge producer. Is extremely tender and has a fine flavor. Stahelin's MacDonadd is from original divisions, and will produce rich, ruby-red stalks so much desired. Prices: Large Divisions, Each \$0.45; 3 for \$1.20; 10 for \$3.50; 100 for \$32.00; 500 for \$125.00.

Canada Red "Chipman Strain"

The Chipman strain of the Canada Red rhubarb is the finest obtainable today. A decided improvement over the common Canada Red. Grows very tall, the stalks growing in immense clumps of 10 to 12. This variety is intensely red, even the flesh is red, making it an especially highly

Crimson King Maple

5 IN 1 APPLE TREE "The City-man's Apple Orchard"

The quintuplet apple is a tree that has been produced so that the small home owner who has a restricted planting space can have a variety of apples over a long picking season. We have budded some of the best kinds so that you will have a Double-Red Delicious, Jonathan, Stayman's Winesap, Yellow Transparent, and Wealthy. These are five of the best varieties and they will bear fruit over a long period of time. The different varieties will bloom at different times and they can be used for ornamental purposes if desired. We have lowered the price considerably, which will enable you to plant this tree at a lower price than ever before. **PRICE: 9/16 trees,** \$1.95 each; 3 for \$5.25.

New

Stahelin's Pedigreed

ASPARAGUS

New PARADISE

Early, Easy to Grow, Rust Resistant, Immense Money Maker

The New Giant Strain of asparagus. It will produce a crop one or two years sooner than will any other known variety today. It is rust resistant, producing stalks of immense size and wonderful appearance. Is easy to grow, and once planted will last from 12 to 15 years with very little care. Paradise is the first asparagus to produce in the spring, and this crop is harvested early when you do not need to be bothered with other things on the farm.

Paradise asparagus offers you a great opportunity to make money. These fine large rooted plants, produced from expensive pedigreed seed, enable you to buy the world's finest at a cost no higher than for common stock. Grown on special sandy soil, fertilized and dug with special machinery to get the whole root system, we offer you a premium plant at a reasonable cost. Paradise asparagus does not require any special care: We have complete culture on asparagus, ask for it when ordering.

MARY WASHINGTON

The pedigreed seed that we use produces specimen stock often more than an inch in diameter. It is very crisp and delicious. Wonderful for canning. The heads of Mary Washington are very solid and compact; thus, always commanding a better price than asparagus that has loose heads. This variety is absolutely rust resistant. Grows very fast and comes up exceedingly thick in the row, producing a very heavy crop. Approximately 5,000 plants are required to set an acre. Once planted they last for years, requiring little care. Starts to bear in Michigan in May and continues for about two full months.

New! MIDGET VEGETABLES

FOR THE SMALL GARDEN
THEIR RICH FULL FLAVOR IS A REAL TASTE-THRILL

Now, with even the smallest backyard space you can enjoy the garden-fresh sweetness of corn just-offthe-stalk... the refreshing flavor of vine-ripened melons. You'll say this new race of miniature vegetables is the best eating you've ever known! Easy to grow; simple cultural direc-

tions with every order. GOLDEN MIDGET SWEET CORN

Tenderest, sweetest corn ever grown! 4-inch butter-yellow ears on 30-inch plants. Ideal for freezing; 6 to 8 ears fill a quart freezer carton.

NEW HAMPSHIRE MIDGET WATERMELON

Miniature 7- to 8-inch melons; easy on garden and refrigerator space! Crisp, juicy, delicious; few seeds, practically no rind; extra high sugar content.

MIDGET MUSKMELON

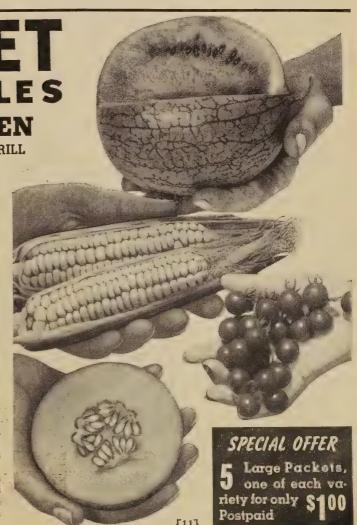

Vines only 3 feet long produce amazing numbers of luscious 4-inch melons, each an individual serving. Superb flavor. Deep orange flesh, edible to the rind.

TINY TIM MIDGET TOMATO

Novel, 34-inch bright red tomatoes on dwarf plants; easy to grow in house or garden. Delicious flavor; a new touch for salads, garnishes and preserves!

BABY BUSH PUMPKIN

Perfect 8-inch pie pumpkins on dwarf bush-type plants! Produce surprising numbers of bright orange fruits. Its fine-grained, deep-golden flesh makes delicious, flavor-rich pies.

T127

The Red Hale peach is a bud sport of the old and commonly known "Hale" variety. We can best describe this peach by comparing it to the Delicious apple. The new Red Delicious apple has the color where the old Delicious doesn't have it, and the new Red Hale peach has the same characteristic. It simply has more color than the old common variety. It is enormous in size, has excellent shipping qualities, and its all red color is making this new strain of the Hale variety an excellent peach to plant where you can pollinize with varieties like South Haven or Hale Haven. It is not a fertile flowering variety and should always be planted with another variety for best results. **PRICED BELOW.**

HONEYGOLD)

10% Larger
than Elberta
Excellent Shipper

HAS NEVER WINTER-KILLED HERE— HAS DELICIOUS FLAVOR

This is the new peach which one of our customers named for us. A native of Michigan and a proven variety that has all of the good points and none of the bad.

The Hon-ee-gold peach is a marvel in size, being slightly on the round type, 10% larger than Elberta, and ripens very late on the tree. Has a beautiful red cheek and packs up beautifully in the bushel. Hon-ee-gold has an excellent flavor, being golden yellow inside with a slight amount of red next to the pit. Somewhat on the dry side, which helps its shipping qualities.

In our tests this peach simply does not rot, but dehydrates and virtually dries up before rotting. Skin texture is heavy like Elberta, thus making an excellent peach for shipping.

Hon-ee-gold is a very thrifty upright growing tree. It has never winterkilled or shown any winter injury whatsoever here. It has everything a real peach needs. Freestone. **PRICED PAGE 12.**

NUGGETT

New California Type Canning Peach

We have watched this new Clingstone peach in our orchard for the past several years and it is distinctly a beauty. It is clingstone until dead ripe and then it will come off the pit. Of brilliant golden yellow color with a slightly red cheek occasionally. It has a marvelous flavor and ripens from 7 to 10 days after Elberta. Especially hardy. This variety has produced a crop when most other varieties were winter-killed. Plant 2 to 6 for home use and you will never regret it. Nuggett—the better peach. **PRICED BELOW.**

GOLDEN JUBILEE

Sweet and Juicy-Good Eating

Somewhat oblong in shape, and has a brilliant golden color with a slight red cheek on one side. Is golden fleshed, very juicy, and a freestone. Perfect pollinizer and the tree is extremely hardy, producing fruit when other trees will be frozen. **PRICED BELOW.**

Golden Jubilee

Careful Bud Selection & Years of Growing

ELBERTA

Famous for Flavor-For Making Money

No other peach has ever attained the popularity of this variety. Roundish oval in shape, golden yellow skin with a slightly red blush on the cheek. It is very thickly skinned, which gives it its shipping qualities. Is a yellow freestone, and self-pollinizer. Trees are quite hardy, although they will not stand frost conditions as well as some other sorts. Enormous producer. **PRICED BELOW.**

Stahelin's Peach Trees, produced under cold weather conditions, are hardy. Priced as low as 20c each in 100 lots.

Sullivan's EARLY ELBERTA

New—Larger—Better—Ripens 7 to 10 Days Before Old Elberta—Sells Fast

Sullivan's Early Elberta is the new type Elberta peach that is sweeping the peach growing section of the country. The tree is very hardy and it is rapidly replacing the old standard Elberta peach wherever it has been tried, chiefly because of its ripening season which is far ahead of the ordinary Elberta. Ripens 7 to 10 days before Elberta, identical in shape, color, flavor, but is slightly larger in size. Excellent shipper. **PRICED BE-LOW.**

SCARLET ELBERTA

Extra Heavy Crops—Needs No Thinning

Ripens a few days earlier than common Elberta, somewhat larger in size, and absolutely hardy. Uniformly yellow fleshed, and its color is blazing bright red. Tree is vigorous, strong growing, and bears young. Sets a heavy crop, but does not require thinning. **PRICED BELOW.**

Experience Produce Stahelin's Sturdy Fruit Trees

HALE HAVEN

Early—Excellent Shipper, Canner

Colors all red long before it is ripe, and retains its richness of flavor over a long period. Is round in shape, very sweet flavor, and ripens about a week before Elberta. Freestone. Is one of the greatest shipping and canning peaches introduced. **PRICED BELOW.**

KALHAVEN

Immense-Red All Over-Good Shipper

A Michigan peach which is a result of a cross between the J. H. Hale and the old Kalamazoo variety. Immense in size; its color and flavor are excellent. Very hardy. It is large, round in shape, is a beautiful red color all over, and is an extremely good shipper. Ripens a few days after the common Elberta. The tree is hardy, makes an excellent growth, and is a self-pollinizer. Freestone. **PRICED BELOW.**

Redhaven

PEACH BARGAIN

18 to 30 in. Size. We have a limited number of peach trees that are from 18 to 30 inches in height. These consist of the standard varieties as follows: Elberta, Sullivan's Early Elberta, Hale Haven, Redhaven, Kalhaven, Perfect Hale, J. H. Hale, Scarlet Elberta, Amber Gem, and White Hale. Price—In lots of 100 only—\$25.00—500 for \$100.00. Price Net, No discount.

REDHAVEN

Excellent Extra Early Market Peach

The Redhaven peach is a Michigan origination which makes it especially hardy. This peach is gaining popularity and it is being very widely planted because of its extreme high red color. It is one of the earliest, if not the earliest, peach that we have and it carries a very high color long before it ripens so that you can pick it at almost any time that you desire. It is an excellent shipper. The fruit is very firm and easy to handle and it has a brilliant golden, firm textured flesh. It is freestone and self-pollinizing. **PRICED BE-LOW.**

NOTICE We cannot ship fruit trees into the following states: California, Colorado, Idaho, Nevada, Oregon, Utah, and Washington.

HEAVY ROOTED

TREES

Make More Money Sooner

If you are planting just a few trees, we recommend the use of 11/16 to 1 in., super-size trees. They bear sooner, they will stand extreme weather better, and they will produce a paying crop for you before the smaller trees will. We give an absolute guarantee that the peaches we sell will grow and produce if given proper care.

RED ROCKET 10% Larger Than Hale Haven-

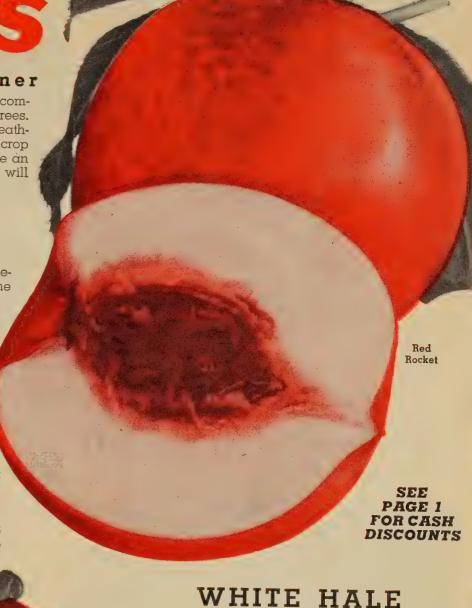

More Color RED ROCKET is the newest of the yellow free-

stone peaches and it ripens at a time when the market is always good. It has an excellent yellow skin with a tremendous amount of red color when fully ripe. The flesh is firm and extremely fine textured. The few trees on tests have been excellent bearers and fruit is outstanding for canning and shipping.

Ripens After Hale Haven

Red Rocket is considerably larger than Hale Haven and ripens about four to six days later. It is a distinct bud sport of Fertile Hale and the tree originated in our orchard—the one branch on the parent tree showing all red and fully ripened when the balance of the fruit on the tree was grass green. A new variety obtainable only from Stahelin. It does not dry rot. PRICE: 9/16 trees \$1.35 each: 10 for \$11.50. Full schedule

Produces Every Year—Delicious Flavor

White peaches are not generally regarded as sorts which are to be planted for market purposes, but owing to the unequalled quality and the extreme size of White Hale, we think it should be more heavily planted for commercial purposes. This white peach originated on our own farm and is the best white variety we have ever seen.

Hardy, Remarkable Flavor

It is exceptionally hardy and has produced a crop of fruit practically every year since it was introduced. The flavor of the peach is remarkable. It is honey sweet in flavor and of very high quality. If you have a roadside trade these peaches will bring you a premium over common varieties. Freestone. PRICE: 9/16 trees \$1.35 each: 10 for \$11.50. Full schedule of prices below.

PLUM TREES

STANLEY PRUNE

The Stanley Prune plum is without a doubt the finest and most beautiful blue plum that we have today. It is very large, very rich in flavor, and it is hardy in all sections of the United States. It is deep blue in color with a golden yellow flesh and it is absolutely freestone. The chief quality of Stanley Prune, other than its large size and beautiful color, is that it does not rot on the tree. **PRICED AT RIGHT.**

MONARCH

One of the best of the blue plums. It is absolutely round in shape, medium to large in size, and the trees are very hardy. The flesh of the plum is golden yellow; and hangs well to the tree. Excellent for canning. **PRICED AT RIGHT.**

YELLOW EGG

A plum that is egg shaped, very large size, and extremely sweet. Prized very much for culinary purposes. Trees grow very large, vigorous, and very hardy. Ripens late August. **PRICED AT RIGHT.**

BLUE DAMSON

The most popular of all preserving plums. Extremely high flavored. Turns a rich wine-red when preserved. Small fruit, dark blue in color, rich golden interior. Hardy, prolific, grows 10 to 12 feet high. Very heavy producer. PRICED AT RIGHT.

Everbearing FIG

Have Sweet, Juicy Figs in YOUR Garden. The Everbearing Fig as we have it is very well adapted to growing in the north. Will produce either in the field or in any container in which you may plant it. Produces the first year set out and

heavily each year after. Is a good size, sweet, firm, and is an excellent fruit for preserving or eating fresh.

PRICE: 18-24 in. trees, 75c each; 3 for \$2.10.

DWARF APPLES

The Gardener's Delight

Small Trees

Large Fruit

The Dwarf Apple trees are only 10-15 ft. tall at maturity and can be planted 15 ft. apart. The fruit produced is the same as, or larger, than that produced on standard trees. Bear quickly—2 to 3 years after planting. Varieties available are Wealthy, Jonathan and Fameuse.

PRICE: 3 Yr. 2 to 3 ft. trees, \$2.45 each; 3 for \$6.75.

HYSLOP CRAB

This is the only variety of crab apple that we list, as it is by far the best. Is a real dark purple color when fully ripened, and has a wonderful flavor. Used by canners for pickling, jelly, etc. Trees produce enormous crops, are long lived, and very hardy. Price: 7/16 in., 3-4 ft. trees, 75c ea. See page 19 for additional apple tree prices.

YELLOW DELICIOUS

Is identical in shape and size with the ordinary red Delicious, but is completely yellow in appearance. Is sweetly acid in flavor, and the flesh is very firm, crisp and juicy. Is a splendid shipper. The trees we offer are all from parent trees that we selected for extra quality, size and vigor. Popular and profitable everywhere. **PRICED BELOW.**

DOUBLE-RED DELICIOUS

This is the improved type of the common Delicious. The Double-Red, naturally colors up much more and much sooner than the old Delicious. The tree does well practically all over the United States. Fruit is a wonderful size, is finely fleshed, juicy, and has a sort of sweet flavor with a slight acid taste. Excellent for eating and the most popular fruit for stand purposes. **PRICED BELOW.**

Stahelin's Improved

APPLES

WEALTHY

This is a variety that apparently does well all over the United States, and is one of the few kinds of apples that can be grown in the northwest successfully. It is a fall apple, medium in size, and has a very fine flavor. Much desired for cooking and pie making. The tree is quick bearing, very prolific, and extremely hardy. **PRICED BELOW.**

GRIMES GOLDEN

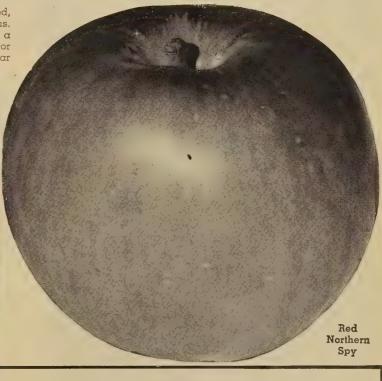

An all yellow apple. Round in shape, medium size, and the tree produces an enormous crop practically every year. It is quite acid in flavor, and is in much demand for canneries or cooking purposes. Quite hardy, and the tree is one of the best pollinizers that we know of. **PRICED BELOW.**

RED ROME

This variety is sometimes known as Gallia Beauty, but is simply an all-red strain of the old type Rome Beauty. It is very highly prized for baking purposes. Is almost a solid red, and the apple is produced on a tree which is very large in size. Fruit is white, crisp, with delicious flavor, and is one of the very best varieties for winter storage. **PRICED BELOW.**

RED NORTHERN SPY

An improved strain of the common Spy apple. We have selected it from the best trees we can find so as to get a Northern Spy that will color up early in the fall. Our Red Northern Spy will do this. Very popular for eating, and housewives demand it wherever it can be secured. Flesh is white, tender and sub-acid. **PRICED BE-LOW.**

Stahelin's APPLE

IMPROVED STRAINS

DOUBLE-RED JONATHAN

Is a solid-red type of the Jonathan variety. It colors up very early in the fall, and enables you to pick your fruit a week to ten days before the common Jonathan will color up. The tree is medium in size, the fruit is firm, crisp and tender. Long lived, productive, and is a very early bearer. A wonderful winter apple. **PRICED BELOW.**

SOLID-RED WINESAP

An improved strain of the old Stayman's Winesap, which gives you a great deal more color early in the season. It is a large, round, cherry red, winter apple which is a wonderful keeper. Has a slight sweet acid flavor, and is very popular for eating or cooking purposes. Tree is very hardy and thrifty. **PRICED BELOW.**

RED MCINTOSH

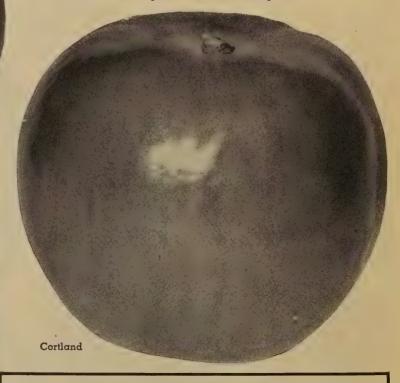

A superior strain of the old type McIntosh. It is practically all-red all over and retains its color and appearance well after being picked. It sticks to the tree a great deal better than does the common McIntosh. It is a very important Fall apple. Trees are very hardy and start to bear quite young. An exceptionally fine eating apple, of good size, bright red color, and a delicious aromatic flavor. **PRICED BELOW.**

CORTLAND

This variety is perhaps the finest of our fall apples. It is a cross of the common McIntosh and the old Ben Davis. It retains all the fine qualities of McIntosh as to flavor, coloring, etc., but it also has the sticking qualities of Ben Davis. It sticks on the tree when the ordinary McIntosh falls to the ground. Extra-large, round apple of beautiful dark red color. Good shipper. **PRICED BELOW.**

NOTICE

We cannot ship fruit trees into the following states: California, Colorado, Idaho, Nevada, Oregon, Utah, and Washington.

TREES QUICK BEARING POPULAR VARIETIES

VARIETIES

ANOKA

Noteworthy for its hardiness and the beautiful red striped fruit which it produces. Bears very early, often having fruit the second year. Fruit is of excellent quality, ripening shortly after Yellow Transparent. It is more adapted to the northern and central sections than the eastern seaboard belt. PRICED PAGE 19.

Anoka

DUCHESS

One of the earliest of summer apples. It is produced on a tree which does not grow to an extremely large size, but is very hardy. An almost round apple of a brilliant yellow color with a slight red cheek. Very popular for pies or preserving purposes. PRICED PAGE 19.

YELLOW TRANSPARENT

This variety is good to eat long before other varieties are ready. Is yellow in color; very crisp, juicy white flesh, and a delicious flavor. One of the best of the early varieties. Tree is very productive; grows rapidly, bears young, and is very profitable. PRICED PAGE 19.

A new early black grape, originated and thoroughly tested by the New York Experiment station. Bunch and berries are large with excellent flavor. fully 10 days before Moore's Early and is an excellent shipper. Huge 3 yr. plants 85c each. Other plants PRICED ABOVE.

DELAWARE

Small, compact bunch, sometimes shouldered. Berries are small, red, with thin skin, and unusually sweet. Ripens with Concord. Very hardy, and enormous producer. Long called the standard of excellence of all grapes as a table delicacy. PRICED ABOVE.

NAPOLEON

This is a choice yellow sweet cherry of highest quality. Large size, very firm, juicy and sweet. A very heavy producer of fruit with bright red cheeks. Sometimes known as Royal Anne or White Oxheart. PRICED AT RIGHT.

SCHMIDT'S BIGARREAU

A hardy strain of Bing, about the same size, and presents much the same appearance. Is a deep mahogany red in color; flesh is tender, juicy and fine flavored. Bears young, hardy, and a sure cropper. PRICED AT RIGHT.

WINDSOR

A large, dark red cherry. Flesh is quite firm, making it an excellent shipping variety. Fruit clings to the tree long after ripe. Trees are hardy, regular prolific bearers, and good pollinizers. PRICED AT

YELLOW SPANISH

A fine yellow cherry that when ripe is slightly darker than Napoleon, which it resembles a great deal. As a yellow cherry it is one of the best. Has slight red cheek when fully ripe. PRICED AT RIGHT. The sweet cherry requires especially high, dry soil for successful growing. If you do not have this soil don't waste your time in planting these trees. They should be planted about 25 ft. square and no trimming should be done on them the first two years.

We produce some of the finest sweet cherry trees in the country. Our alluvial soil produces a very fibrous root system which is quite contrary to the general trend of sweet cherries in other districts where they have only a tap root. We suggest that you plant at least two trees, even if of the same variety, for cross pollination.

BLACK TARTARIAN

Very common black sweet cherry. The inside flesh is purple or darkish black, and is very sweet and juicy. Popular for eating, canning and shipping. Ripens early. PRICED BELOW.

RED LAKE CURRANT

The finest Red Currant today. Originating in the northwest it is very hardy and will grow almost anywhere. Ripens mid-season. Bunches are large and very easily picked. Bush is thrifty and grows quite tall.

GOLDBECK PERFECTION APRICOT

A perfect variety in regards to vigor and hardiness. Very uniform in size, averaging about like a middle size peach; has a delicious flavor. A rich golden colored apricot-yellow, ripening evenly all over. Can be picked tree ripe for shipping. The finest apricot of today. Prices: 3-4 ft. \$1.50 ea., 3 for \$3.75; 10 for \$11.95. $4\frac{1}{2}$ ft. up \$1.95 eq., 3 for \$4.50; 10 for \$12.50.

WILDER CURRANT

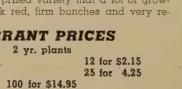

One of the most popular of Red Currants in this large currant-growing section; a fine commercial variety; large bunches and very firm.

RED CROSS CURRANT

A very highly prized variety that a lot of growers prefer; dark red, firm bunches and very reliable.

CURRANT PRICES

MONTMORENCY SOUR CHERRY

VERY HARDY AND PRODUCTIVE

The Montmorency cherry trees that we offer are all grown under state supervision and are guaranteed virus free and of the best bearing strains that can be procured. We are budding only from the finest parent trees that we can find. Our sandy soil here produces a fibrous system second to none in the country and our cold weather, coupled with the long growing season, produces a hardy tree and one which is ready to start producing for you.

COMMERCIAL GROWERS

We raise Montmorency cherry trees by the thousands and we can quote special prices to you folks in the commercial cherry growing sections who plant these trees in large quantities. If you are interested in quantities of 200 to 1,000 trees, it will pay you to come and see us or write us for prices on these fine trees.

EARLY RICHMOND SOUR CHERRY

A variety somewhat similar to Montmorency only it is slightly smaller in size. The trees grow identical, but the Early Richmond ripens a crop and is out of the way before the Montmorency starts to ripen. Self pollinizing.

A Beautiful Red-Leaved Tree that Bears Peaches.

We offer this brilliant new red leaf shrub as something entirely new in the ornamental field. This new shrub is not only a brilliant ornament, but it produces worthwhile fruit at the same time. The fruit from this tree is white, medium size, and very highly flavored, making it especially desirable for pickling. Its habits of growth are practically identical with the common peach and its deep rose color blossoms against the red foliage produces a very pleasing picture when set among other plantings.

PRICE: 3 to $4\frac{1}{2}$ ft. trees 95c each; 2 for \$1.80; 10 for \$7.50. $4\frac{1}{2}$ to 6 ft. trees \$1.50 each; 2 for \$2.50; 10 for \$11.50.

PEAR TREES

CLAPP'S FAVORITE

Perhaps the largest of all pears, and always tops the market because of its excellent appearance. It is greenish yellow skinned with a dark red blush. Is quite juicy and sweet. Is a good shipper and the fruit ripens a few days after Bartlett. **PRICED BELOW.**

BARTLETT

The favorite commercial pear. Fruit is very large, juicy, orange-golden yellow in color with a soft blush. It is quite uniform in shape. Favorable for shipping, canning, and eating. The tree is a strong grower, and produces very young. Hardy, and a regular bearer. **PRICED BELOW.**

SECKEL

A little red sugar pear. It is richest, highest flavored pear known. Is much desired for pickling and canning purposes. Tree is very hardy. Ripens late September. **PRICED BELOW.**

BOSC

A popular pear in California due to its wonderful keeping qualities. A very long-neck pear which is used for boxing purposes, but is highly desirable because of its excellent flavor and shipping qualities. Tree bears young and is hardy. **PRICED AT RIGHT.**

FLEMISH BEAUTY

A pear that is absolutely honey sweet in flavor when fully ripe. Is medium to large in size, pale yellow colored with a reddish brown cheek. Flesh is fine grained, juicy, rich and very sweet. Tree lives to a remarkably old age. **PRICED AT RIGHT.**

LAWSON

Ever since we have listed the Lawson variety we have never been able to supply the demand. This pear, which is about the same size as Bartlett, ripens fifty days before Bartlett. It comes on the market when there are absolutely no other pears to be had. If picked properly it is very juicy and very rich in flavor. It is golden yellow with a briliant red cheek. The tree grows to a very tall height and is quite free from blight. If you like pears and want an early variety, Lawson is the one that you should plant. **PRICED ABOVE.**

DWARF PEAR TREES

THE TREES ARE SMALL BUT THE PEARS ARE BIG

These small dwarf trees can be grown in your backyard or anywhere that you are restricted for space. They are small at maturity, bear early, and produce the same high quality fruit as large size trees. Available in Bartlett, Lawson, and Flemish Beauty varieties.

Pyramidal Arborvitae

COLORADO BLUE SPRUCE—The Colorado Blue Spruce is without α doubt one of the finest of blue type evergreen trees. It grows to a great height and is an ornamental tree of glistening silvery blue from early spring to midsummer. As originated in the cold section, it is very hardy and is perhaps the most showy and popular of all spruce trees. We have grown an especially fine lot of this spruce, the seeds taken from carefully selected trees so as to obtain the very finest of blue color.

PRICES: 8-10 in., twice transplanted, 85c each; 3 for \$2.40; 10 for \$7.50; 50 for \$35.00, 12-15 in. trees, \$1.95 each; 3 for \$5.40.

DOUGLAS FIR—Fast and tall growing variety. Symmetrical shape with color varying from yellowish green to bluish green. Very beautiful and hardy. PRICES: 8 to 10 in., heavy transplants, 85c each: 3 for \$2.40.

IRISH JUNIPER—A tall columnar type with silvery green foliage. Very erect and slender, Excellent for use at entrances. Reaches a height of 7 to 8 ft, at maturity or can be trimmed to any desired height. PRICES: 12 to 18 inch, heavy transplants, each \$1.25; 3 for \$3.50.

PFITZER'S JUNIPER—Favorite of all spreading Junipers. Low, spreading bush with plumelike branches. Beautiful silvery blue-green foliage. Very hardy and will stand considerable shade. PRICES: 8 to 10 in. heavy transplants, 85c each; 3 for \$2.40. 18 to 24 in. balled trees \$2.75 each; 3 for \$7.50.

SAVIN JUNIPER—Rich dark green spreading type Juniper. Very similar to the Pfitzer. Ideal for use under windows. Height at maturity 4 to 5 ft. PRICES: 8 to 10 inch, twice transplanted 60c each; 3 for \$1.50. 12 to 15 inch, heavy transplants \$1.95 each; 3 for \$5.25.

SPREADING YEW—This type of Yew is similar to the Pfitzer. Branches out from the bottom into α low bushy formation. Can be trimmed to desired height or to fit space. Foliage of dark green. PRICES: 8 to 10 inch, heavy transplants \$1.10 each; 3 for \$2.95. 15 to 18 inch trees \$3.95 each; 3 for \$10.50.

HATFIELD YEW UPRIGHT—Grows in columnar, erect form. The color is extremely dark green, the foliage is heavy and luxuriant. Very hardy, easy to grow and does well in shade. PRICES: 10 to 12 inch, heavy transplants \$1.45 each; 3 for \$3.75. 18 to 24 inch trees \$3.35 each; 3 for \$9.25.

BLACK HILL SPRUCE—One of the hardiest of Spruces. Bushy, compact, and usually symmetrical. Foliage from green to bluish green with branches close to the ground. **PRICES: 9 to 12 inch, heavy transplants each 80c; 3 for \$2.25.**

PYRAMIDAL ARBORVITAE—Grows compact and develops into a perfect pyramidal form. Foliage of deep green, and retains its color through the season. Grows to a height of 12 to 15 ft. PRICES: 10 to 12 inch, twice transplanted, 95c each; 2 for \$1.80.

BIOTA AUREA NANA—A very compact slow-growing type. The flattened leaf-clusters, face outward edgewise. Fresh yellow-green in color. Dwarf, conical form. PRICES: 8 to 10 inch 65c each; 3 for \$1.50. 18 to 24 inch trees \$2.95 each; 3 for \$8.25.

THOMAS BLACK WALNUT

Big Profits And Delicious Nuts From A Beautiful Shade Tree!

The life of a black walnut tree is so long that you cannot afford to buy a tree which is not properly budded or a tree which is grown from buds taken from a poor parent tree. Great care has been taken to bud the Thomas Black Walnut from the best parent trees to be found and a difference of a few cents' saving in the cost of one of these trees, when you take into consideration that it grows for almost a century, might cost you a lifetime of disappointment.

Giant Size Nuts—Easy to Grow

The Thomas Black Walnut is an improved grafted tree. It produces nuts of very large size, very thin shell, and which crack very well. These nuts have a wonderful flavor and are famous for carrying their flavor through cooking. and baking processes. The Thomas Black Walnut is easy to grow as these trees flourish under almost any condition that is not too wet.

✓ Bears Up to 40 Bu. per Tree

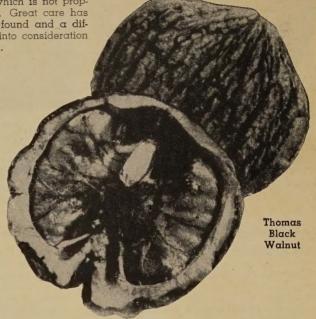

The tree grows to a very great height and attains this size in a very short time. A matured tree will bear from 15 to 40 bushels of giant size nuts during a twelve-months' period. Being of superior cracking qualities, usually you find, a very ready market for them.

Begins Producing Second Year

Thomas Black Walnut trees usually begin bearing the second year after planting from the nursery and will continue to grow for an almost unlimited time. They flourish almost any place in America and are not particular as to soil. Plant a tree or two for your own use and if you have room, plant more for profit. They not only produce profitable crops but the tree itself will produce valuable timber in the course of time.

PRICES on Thomas Black Walnut

18-24 in. trees, \$1.75 each; 2 for \$3.25; 6 for \$8.95; 10 for \$13.95. 2-3 ft. trees, each \$2.25; 2 for \$4.20; 6 for \$12.25; 10 for \$19.50.

NATIVE BLACK WALNUT

Stahelin's Black Walnuts are grown from seed produced on our own farms from the Thomas, Stabler and Weird varieties. While not as thin shelled as the nuts from cultivated trees, they are excellent and you still have a better Black

Prices: 2-3 ft. trees, 65c each; 3 for \$1.50; 10 for \$4.25; 3-4 ft. trees, 75c each; 3 for \$2.10; 10 for \$6.50.

Chinese **CHESTNUTS**

The Chinese Chestnut is the only Chestnut that we know of that is blight resistant. The seed from which our trees are grown are all collected from trees that are known to be true blight resistant and so isolated that the pollen from other Chestnut trees cannot mix with them. We offer these trees in two sizes, 2-3 and 3-4 ft., and both will be very well rooted but by buying the large size trees

Chinese Chestnut

you will save several years time and they will come into bearing that much quicker. PRICE: 3 yr. 2-3 ft. \$1.25 each; 2 for \$2.25; 5 for \$5.25; 10 for \$9.50, 4 yr. 3-4 ft. \$1.75 each; 2 for \$3.25; 5 for \$7.50; 10 for \$13.95.

BUTTERNUT

This native nut tree grows in almost every section of the United States. Attains large size at maturity. Starts to bear very early, about 3 to 5 years of age, and will produce a crop annually. The native Butternut is a conical shaped nut that is very nutritious, carrying a very large amount of oil. It grows very easy. It makes an excellent shade and you can plant them in any corner or other sections where ordinary trees cannot be produced, as they require no spraying. PRICES: 2 yr. 2-3 ft. trees. 75c each; 3 for \$2.10; 10 for \$6.50.

Hardy ENGLISH WALNUTS

NORTHERN GROWN, THIN-SHELL

Plant Nut Trees for Profit, Beauty, Shade and Pleasure

The Hardy English Walnut as we have will grow in practically any type of soil that is not excessively wet. Their hardiness and rapidity of growth, their long life and beauty, and finally their timber makes them very desirable and interesting for those that have a little room in which to plant trees. They require no special care and they add greatly to the value of any property on which they may be planted.

The Hardy English Walnut which we have is the result of many years of experimentation and of guaranteed proven quality. Extensive plantings have been made in many midwestern states as well as the states below the Mason and Dixon line. All-have proven successful.

The English Walnut is ornamental, and does not look like any other tree. It gives an abundance of shade and like many other trees is not always fertile. Therefore, we suggest that more than one should be planted for cross pollination, and guaranteed success. This is a tree that we personally think everyone should plant. They are not common. They excite much interest. They are beautiful in appearance, make a lot of shade, and will produce a fine crop for you when the ordinary shade tree produces nothing.

CARPATHIAN OR WILLSON WONDER. STATE VARIETY. PRICE: 2-3 ft. trees, \$2.25 each; 2 for \$3.95; 5 for \$9.50; 10 for \$17.95, 3-4 ft. trees, \$2.95 each; 2 for \$4.95; 5 for \$10.50; 10 for \$22.50.

FREE CULTURAL INSTRUCTIONS FOR ALL NUT TREES INCLUDED WITH ORDER IF REQUESTED

HYDRANGEA BLUE

This is the most perfect of all the Blue Hydrangeas It does best under acid soil conditions and will grow under shade better than any other hydrangea. The blue color is produced almost entirely on the new wood. Flowers on the old wood the second year will show slightly pink so we recommend pruning to get all the new wood possible.

At maturity this Hydrangeas

At maturity this Hydrangea will be 2 to 3 feet in height and a mass of solid blue flowers.

Strong 2 yr. field grown plants \$1.25 each; 3 for \$3.25

NEW Michigold PEACH

Large Size and Brilliant Color

This variety ripens at about the same time as Hale Haven although it may be two or three days later in some localities. It is fully 15 to 20% larger in size. Has a brilliant golden color with a large amount of red if it is allowed to ripen, at which time it will run fully 60% red. It is a better quality peach than Hale Haven or South Haven and its large size always makes it bring a premium. It is freestone, self-pollinizing, and the tree is extremely hardy, which is due to the fact that this variety originated in Michigan. Michigold should be more heavily planted by commercial growers.

Starglow APRICOT

A VERY HARDY APRICOT. ORIGINATING IN MICHIGAN

This marvelous new apricot originated in central Michigan and is of very large size, brilliant yellow color, marvelous flavor, and absolutely freestone. The fact that this apricot is a seedling which came up in Michigan should make it especially hardy and late flowering, which is a very desirable feature in all apricots. Starglow apricots will produce a crop of fruit for you where most of the other apricots will fail. Self pollinizing.

PRICE: 3 to 4 ft. trees \$1.50 each; 3 for \$3.75; 10 for \$11.95. $4\frac{1}{2}$ ft. and up \$1.95 each; 3 for \$4.50; 10 for \$12.50.
